

# Discover your next move.

Cloud Discover allows you to see  
your environment like never before.

The world of cloud is complex. Understanding the detail of your current environment will help you to take that next step.

Macquarie Cloud Services' Cloud Discover tool, is here to ensure you have the data at hand to make informed decisions on what you should do next – both in the choosing the ideal platform and a commercial model that's right for your business.

We're proud to be Australia's most recommended cloud provider with an industry leading Net Promoter Score of +88. Our experts are here to ensure your solution is fit for purpose now as well as into the future.

Sizing cloud environments reliably is not just about porting existing capacity to cloud, it is about understanding rightsizing and optimisations available on different platforms. Cloud Discover is the tool you need.

## What to expect:

- **Current platform utilisation** and recommendations for right sizing.
  - **Current network flows** including east-west traffic, with recommendations for enhancing security posture.
  - **Information about the Hybrid Cloud landscape**, and the features and limitations of each type of platform.
  - **This non invasive engagement** will ultimately result in fully costed options for Private, Public and Hybrid Cloud solutions.
- 

## How it works.

1

Licensing and instructions to install 2 VMware metadata collection tools into your vCenter environment. (Week 1)

2

Metadata collected is stored in our secure portal within Australia. (Week 2 & 3)

3

Our expert teams analyse your environment from data collected. (Week 3)

4

A full recommendations report prepared by leading consultants. (Week 4)

## If you answer yes to any of the questions below get started on your Cloud Discover Assessment today:

- 1 Are you thinking of moving or upgrading your current environment but not exactly sure the best path to take?
- 2 Would you like a free, zero obligation report outlining recommendations and suggestions for your cloud environment based on utilisation and right sizing?
- 3 Do you wish to future proof your IT strategy for a post COVID world?
- 4 Would your security posture benefit from understanding all traffic flows within your environment including east-west traffic?

## Why Macquarie Cloud Services?
