

When it comes to security, don't get caught behind.

Data breaches cost Australian small to medium businesses an est. \$328million, just between July and Sept last year!

Every day, more and more businesses of all sizes are being hit. You can't stop being targeted by cyber criminals, but you can stop them from harming your business.

With data breaches more prevalent, Macquarie Cloud Services has created a suite of new cyber security options to protect users, applications and data.

We're proud to have the strongest cyber security credentials in country that can safeguard your business, reputation and give you more time to focus on your core business.

With 15 years of security strong Managed SOC and SIEM capability we have gained the highest Microsoft Azure accreditation. Our 2 different Managed SOC and SIEM solutions give you the security blueprint you need to protect you from today's threats. We'll advise, implement and monitor, and you have access to our security experts, so you're never on your own.

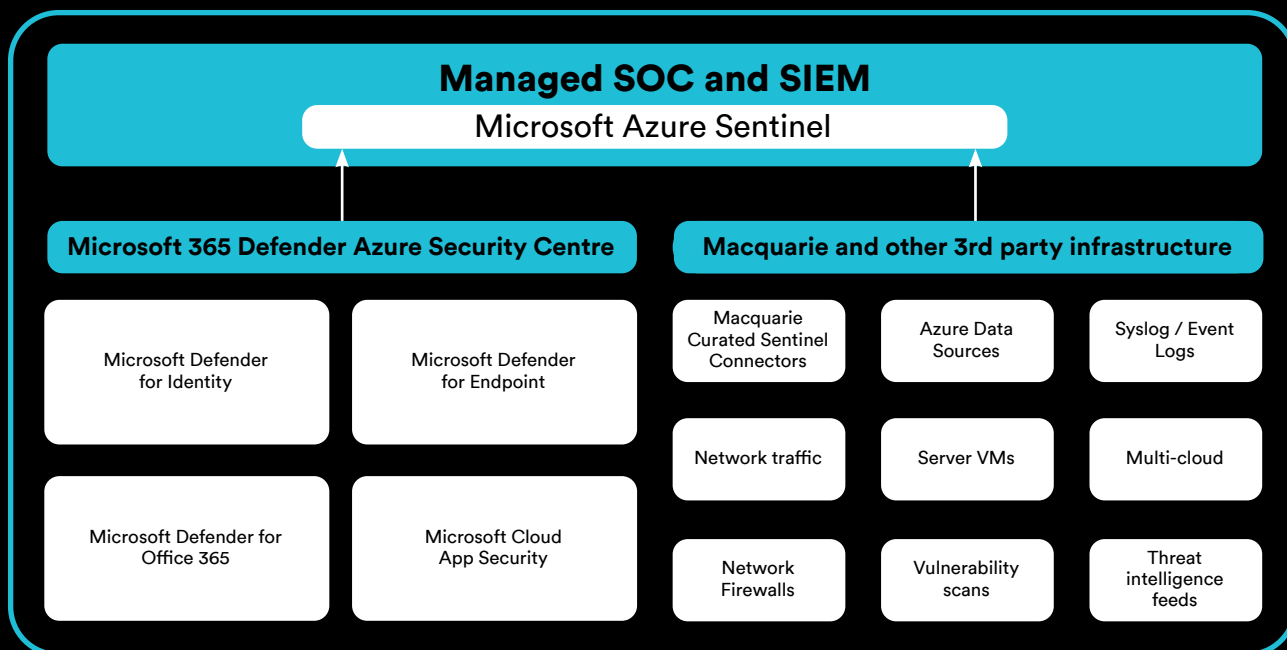

Every business has risks. It's how you manage them that will set you apart.

**We secure your environment,
on premise, in colocation
and in the cloud.**

Why our customers sleep well at night:

- We monitor any event or threats to your digital assets 24x7, rapidly responding to any security incidents.
- We've been the trusted Security partner of Australian Federal and State Governments since 2001.
- Our staff are cleared and approved for Government duty, and all our platforms and processes are externally audited and fully compliant.
- We provide high-level cyber security, but without the need for government-level security departments or budgets.
- We're Microsoft specialists, simply securing current office systems in a way that's simple for users and maximises the tools already in place.
- 100% Australian operated, we make sure every client has easy access and that nothing leaves these borders that shouldn't.
- Clients have full, real-time access to event and monitor data, and if they need to talk tech, our security analysts are available around the clock.

Protecting your business just got easier with Managed SOC and SIEM, Macquarie's Security Specialists, and Azure Sentinel.

Real-time formal tracking and investigation by local analysts.

A managed Sentinel implementation providing full visibility of threats including automated remediation with or without human intervention.

Fully integrated with your Microsoft Environment.

Powered by Azure Sentinel, our Australian-based dedicated security practice specializes in seamless integration with your existing Microsoft 365 and Azure deployments. Just say the word.

Defend your organisation from security threats in the cloud and on-premises.

Robust coverage with rapid threat detection including ransomware and phishing, enhanced by insights from Macquarie's Threat Intelligence platform.

Real-time formal tracking and investigation by local analysts.

- Macquarie's security blueprints enable protection for organisations large and small, regardless of where you are on your security journey.
- Expertise available when you need it 24 x 7. Extend your existing team by working with our security specialists backed by our long standing strategic relationship with Microsoft.
- Rapid threat detection capabilities enhanced by insights from security intelligence, machine learning, and behavioural analytics. Incident resolution recommendations to lower time spent on threat investigation.
